Reboot Appliance

Contents

Overview

This document covers te procedure to restart a Swivel appliance.

Prerequisites

Swivel appliance with CMI

Symptoms

A number of symptoms may be resolved by individually restarting services and not require a reboot.

A reboot should be performed after installation to ensure that all services start as expected.

Solution

Login to the the CMI and select the Advanced Menu, then Admin Menu, then select Reboot appliance.

Troubleshooting

See Appliance fails to boot after power outage
