

Two Factor Authentication

Overview

Single Factor authentication consists of one of the below, Two Factor Authentication (2FA), sometimes also called Multi Factor Authentication, consists of two of the below:

- Something you know (e.g. PIN, Password)
- Something you have (e.g. [Mobile Phone](#), [Hardware Token](#))
- Something you are (e.g. Fingerprint, retina scan)

Two or Multi Factor authentication cannot consist of two of the same type, for example PIN and Password.
