Two Factor Authentication

Overview

Single Factor authentication consists of one of the below, Two Factor Authentication (2FA), sometimes also called Multi Factor Authentication, consists of two of the below:

- Something you know (e.g. PIN, Password)
 Something you have (e.g. Mobile Phone, Hardware Token)
 Something you are (e.g. Fingerprint, retina scan)

Two or Multi Factor authentication cannot consist of two of the same type, for example PIN and Password.
