  - ◆ 1.5 AuthControl Desktop

## Welcome to the Swivel Secure Knowledgebase

This is the new Swivel Secure Knowledgebase that will be used to host the latest articles about the latest Swivel Secure Products.

## How to Obtain Support

Direct support is provided through our reseller channel:

**Customers:** Contact their **Reseller** for initial support, who will escalate the problem directly with Swivel Secure should they be unable to resolve the problem.

**Resellers:** If the knowledge base does not resolve your query, resellers are encouraged to contact their **Distributors**.

**Distributors:** Can raise support tickets through the Support Portal.

## Sentry Articles

AuthControl Sentry is the new name for Swivel Secure's authentication platform, previously known as "PINsafe". It includes the new Adaptive Authentication and Web Single-Sign-On Platform, as well as the updated core authentication engine. Where the two parts of the product need to be distinguished, we refer here to "Sentry Core" and "Sentry SSO".

The following articles refers to version 4 of the software, which has already been released.

If you are interested in learning more about Sentry email [sales@swivelsecure.com](mailto:sales@swivelsecure.com)
