## Overview

When the BUTton image is selected for use on the PINsafe server it reverts back to the TURing image.

## Prerequisites

Problem has been observed on the foolowing PINsafe versions:

PINsafe v3.7.3474

## Symptoms

On the PINsafe Administration console under the Server/Single Channel settings, the Image displayed to users can be set to BUTton. After a period of operation the image reverts back to the default TURing image.

## Solution

Upgrade to a later version of PINsafe
