Citrix Access Gateway Access Controller 5.0

PINsafe integrates with the Access Controller 5.0 using RADIUS authentication. The following authentication methods are supported:

- SMS
- Mobile Phone Client
- Email
- Taskbar utility

Please refer to the Citrix Access Controller Administration guide for further information on configuring the Access Controller.

The single Channel graphical TURing image cannot currently be embedded into the login page when using the Access Controller 5.0, but we hope to offer this enhancement at a future date. Please contact Swivel Secure to register your interest.
