Overview

How to restart Tomcat

Prerequisites

Swivel appliance or Windows installation

Symptoms

[Turing Image absent](#)

[Transport Queue Locked](#)

Solution

Swivel Appliance Tomcat Restart

Login to the appliance through the [CMI](#)

Select Tomcat, then select Restart

Windows Software install Tomcat Restart

If the Tomcat utility is available in the Taskbar, then this can be used to restart Tomcat.

The Windows Services allows Apache Tomcat to be restarted.

Troubleshooting
