Symptoms Template

SWIVEL
the power of knowing

Contents

Overview

This is an example symptoms template. In this section you must detail what the solution addresses in brief.

Prerequisites

In this section you must detail the version(s) that this particular solution applies to, as well as Database/Directory authentication integration products that are relevant.

Symptoms

List the symptoms from the symptoms database that this solution applies to. If a symptom doesn't exist, add it to the database and append to any solution articles that would share the new symptom.

Solution

Clearly detail how to fix the solution in a simple manner.
