

# Tomcat stops after logout out of CMI

## Contents

- [1 Overview](#)
- [2 Prerequisites](#)
- [3 Symptoms](#)
- [4 Solution](#)

## Overview

An overview of the solution

## Prerequisites

PINsafe appliance affected version:

Appliance build 2.0.9a, CMI 0.9z-5

Also has been seen on

Appliance build 2.0.8, CMI version 0.9r

## Symptoms

When a logout is made on the CMI after restarting or using stop and then start on Tomcat through the CMI, Tomcat stops.

## Solution

There are several solutions to this issue

Restart Tomcat through the Webmin interface

Restart Tomcat through the command line

Upgrade CMI version
